

## **Indiana Implant Dentist Receives training in Cutting Edge Protocol to Rescue the Denture Sufferers**

*Dr. Irfan (Ivan) Atcha and 15 other Advanced Dental Clinicians from all across the U.S. were selected to get trained on Zygomatic Implants Surgical and Prosthetic protocol in Montreal Canada. This specialized surgery will allow patients who previously were not able to wear implant supported teeth on the upper jaw, due to lack of supportive bone, to do so without multiple and expensive bone enhancing surgeries, which sometimes included grafting bone from the patients hip. The nature of this revolutionary procedure also improves healing and reduces post surgical discomfort.*

Dyer, IN ([PRWEB](#)) June 29, 2009 -- Dr. Irfan (Ivan) Atcha and 15 other selected dental clinicians across the U.S. were invited by Nobel Biocare (world's largest Dental Implant manufacturer), Dr. Yvan Fortin DDS and Dr. Richard Sullivan (Clinical Director of Nobel Biocare North America) DDS to get trained on Zygomatic Implants (No Bone Solution) for patients with little to no bone left on the upper jaw at the Centre D'Implantologie Dentaire in Quebec, Montreal.

Treatment of the fully edentulous (all teeth missing) upper jaw with moderate to severe bone loss with a fixed implant supported teeth is a challenge. One alternative long available has been the utilization of bone transplant (bone grafting) often from patients hip, chin, jaw, and the skull. This required second surgical site, long healing time, and more costs associated to the patient.

"By offering our patients with the implant alternatives to bone grafting with the Zygomatic Implants for the completely edentulous (missing all teeth) upper jaw we are able to fabricate either a fixed or removable implant supported prosthesis (teeth)," says Dr. Atcha. Long zygomatic implants in each side of the upper jaw along with 2-4 conventional implants patients can get their teeth for chewing and social purpose sooner than later as extensive bone grafting is not required and thus it is more cost effective to the our patients as well says Atcha.

"It is a pleasure to have clinicians like Dr. Atcha to get trained on advanced procedures like this as it will only benefit the patients he will treat in his office by restoring their chewing and biting and overall oral health," mentions Dr. Richard Sullivan (Clinical Director of Nobel Biocare North America). Dr. Atcha has already helped many other patients for years in his practice that are denture sufferers or have ailing dentition with graftless and immediate loading solution procedures like the All-on-4 with the Teeth-In-One-Day concept and also with Teeth-In-An-Hour procedure as well.

"The Zygomatic Implant technique will allow me to help the patients with advanced bone loss that have been wearing ill fitting dentures for years and have been told by their dentist that they have no solutions as the only solution for them is to wear a lousy upper denture," says Dr. Atcha. "I am very passionate about helping patients that want a new lease on life with having teeth to chew and enjoy their favourite foods again. We are the only office of its kind in the region that is providing this cutting edge procedure to the denture sufferers," says Atcha.

Dr. Irfan Atcha maintains a private dental practice limited to Dental Implants placement and restoration and advanced IV Sedation in Dyer, IN. He attended the University of Illinois and graduated with a D.D.S. (Doctor of Dental Surgery). He has completed extensive post-graduate training in Dental implants surgical and prosthetic components. He also has extensive training in Advanced Anesthesia techniques for his patients comfort to rescue the dentally disabled and the disastrous. He has completed over 1000 hours of advanced CE over the last 2 years

in Implants, Sedation and Cosmetic Dentistry to stay on the cutting edge techniques. He also is a Diplomat of the International Congress of Oral Implantologists(ICOI).

His office tries to recreate a spa-like atmosphere and his services include Sedation, Implants, and Cosmetic dentistry, sleep apnea treatment, TMJ dysfunction treatment, laser dentistry, fluorescent oral cancer screenings, and digital radiography including a digital i-CAT CT scanner for exceptional patient care. His office is online on Facebook and the office website is: <http://www.NoDenturesChicago.com>. His office phone number is 888-416-4109.
