

Indiana Dentist Changes the Quality of His Patient's life Through the Miracle of Dental Implants

Dental Implant are the best thing that happend to the profession of Dentistry. It reconnects people to something that they have lost. Dr. Irfan (Ivan) Atcha helps his patients in his Center for Implants, Sedation and Cosmetic Dentistry in Dyer, IN with the miracle of Dental Implants.

Dyer IN ([PRWEB](#)) February 16, 2009 -- The Center for Implants, Cosmetic and Sedation Dentistry in Dyer, IN was founded upon the principal that no one should have to live without teeth. Dr. Irfan (Ivan) Atcha DDS recognized that Indiana, which ranks no. 11 in states having people with the most missing teeth, is home to many residents who have very high fear of dentists, and what Atcha calls "dentally disastrous" because of the severity of their condition. "These are people who have been away from a dental practice for 10 or more years because of their advanced gum and bone disease or dental decay, because they have established a fear of dentists early in life, or because they have been told there is no help," says Atcha.

One of those patients, MaryAnn of Gary, Indiana, says her condition was traumatizing before she sought the help of Dr. Atcha and his team at the Center for Implants, Sedation and Cosmetic Dentistry. "Before it was such a wreck--broken, painful, infected. I was in pain, agony and it was constant because of the infections. For the past year, I wasn't motivated. I was just surviving day-to-day because of the pain," says MaryAnn who then, after being told by another dentist that she would have to have dentures for the rest of her life, sought the help of Dr. Atcha at the Center for Implants, Sedation and Cosmetic Dentistry. "It's astonishing to see people's reaction, and mine too. I'm talking more, smiling more, I'm no longer afraid to crack jokes. I feel complete. It's unbelievable. They're perfect. I won't wake up anymore in pain. I can sleep, eat all my favorite foods and I'm not self conscious to go out in public and socialize. It's absolutely life changing, I feel totally complete," says MaryAnn.

MaryAnn benefit from 5 dental implants in her upper jaw after removal of all her decayed and diseased teeth. The implants were placed the same day the teeth were removed and within few weeks not months or years MaryAnn had her fixed upper implant teeth that she would never have to remove again! All of her care was done under IV sedation by Dr. Atcha for her comfort. "I recall no memory of my surgery" I just remember them waking me up telling me that my bad teeth are out and my implants are in and I did great", says MaryAnn.

Dr. Atcha recognizes the importance of ending the physical and emotional suffering, restoring quality of life. "We've helped change people's lives. Patients are much healthier because it's important to have teeth, for chewing, smiling, and self confidence". "We want people to know they no longer have to suffer with dentures, partials, or missing teeth," says Atcha who also brings the best advancements in sedation to his clients for their comfort. "We administer everything from light nitrous oxide to advanced I.V. sedation and general anesthesia depending on the patient's request and anxiety level" he says. The overall cost of delaying dental care, or no treatment at all, is much more expensive because you are always losing bone if you have missing teeth and wear dentures and the bone never comes back. "Dental Implants holds the jaw bone jaw bone from shrinking", says Dr. Atcha

Although patients get concerned about cost of the care with Dental Implants , Dr. Atcha believes the "cost should never come in the way of your health, especially because the mouth is the pathway to other health problems," says Atcha.
